

Switch to network scanners for increased connectivity

The Epson network scanner range is built with performance at its heart, making it the ideal solution for workgroups and teams looking to share documents quickly.

Compact

The range is built using Epson's scalable modular architecture (CMA) design ethos, which ensures a consistent user experience whichever model you choose. The range includes models that can be positioned in front office, customer-facing environments or high-volume back office departments - even where space is limited.

User friendly

The range of products makes sharing documents fast and easy, both in small teams and in enterprise-level organisations. Choose from the ES-580W and its built in Wi-Fi and scan to memory device features, the DS-730N with its quick scan functionality, or the DS-780N for its ability to authenticate users¹ for a more secure scanning environment.

Intelligent

The range comes with intelligent features, including ultra-sonic sensors and a paper protection function. Difficult media can be captured with ease, using slow mode to reduce roller speed, without increasing file sizes. Double feed detection skip means difficult documents such as envelopes and post-it notes can be processed rapidly.

Versatile

The range offers high capacity 100 sheet ADF and scan speeds of up to 45ppm/90ipm, so bulk jobs and media from 27gsm through to 413gsm can be captured as quickly and easily as a single file, with minimal user intervention.

DS-730N

Affordable standalone scanning solution

The DS-730N is a cost-effective, highly efficient network scanner that connects your business at the touch of a button.

Use Epson Webconfig to create jobs, including Scan to Email, Folder, FTP and SFTP, without the need for a PC or server, or use Epson Document Capture software to scan to cloud services and Microsoft applications at the touch of a button².

Three Quick Send buttons and a 1.44" colour LCD display enables you to choose the correct job and send documents to the right destination, including up to 300 contacts, without delay.

Take advantage of image and text enhancement to improve image quality and ensure files can be read without loss of crucial information.

DS-780N

Intelligent, secure business scanning solution

The DS-780N is a compact network scanner that speeds up workflows by enabling users to rapidly scan and share documents securely over a network.

Utilising the Authentication Edition for Document Capture Pro Server, IT administrators can manage a variety of tasks centrally from scan job profiles to user access rights.

Create and manage job profiles and user access remotely with Epson Document Capture Pro Server software. Only authorised users can access jobs using a secure PIN code on the touchscreen panel.

ES-580W

Powerful wireless business scanning solution

The ES-580W is the ideal sheetfed scanner for small businesses and home offices, with an easy to use, large touchscreen.

Digitise your business and get organised with the intuitive Epson software tools that enable you to make your documents available whenever and wherever you need. Scan A4 documents, as well as receipts, plastic cards and business cards.

Use Epson SmartPanel and Epson Connect services on wireless devices to send and store documents into your preferred cloud accounts. Epson Smart Panel enables you to control your scanner from smart phones and tablets. Simply scan, save and send.

Intuitive software

Epson's software suite is a range of easy-to-use solutions for scanning, separating and sending documents around your business and beyond.

WebConfig DS-730N

WebConfig allows you to create job profiles and presets without a PC or server. Up to 300 contacts can be added, and it allows for a document to be scanned once and automatically sent to several separate contacts. It also includes many image enhancement options such as shadow, background and noise removal, blank page skip and page rotation.

Smart Panel app ES-580W

Power your scanner from your fingertips. Epson Smart Panel enables you to control your scanner from smart phones and tablets including changing the wireless settings and 'scan to' maintenance. Scan files to Box, Dropbox, Google Drive, Microsoft One Drive and iCloud on the go.

Document Capture Pro DS-730N, DS-780N

Document Capture Pro 3.0 has advanced features for naming, separating and routing documents that makes scanning easy and enables you to send files in common formats like PDF, jpeg, tiff and many more. The software also features tools to enhance and improve the quality of an original document, including auto rotate and deskew, paper size detection, colour enhance/dropout and text enhancement to ensure that the best quality is achieved for future data use.

1. Requires additional card reader at extra cost and use of Epson Document Capture Pro Server Authentication Edition
2. Some features require the use of Epson software packages
- 3 Feature available with Epson Document Capture software
