60 sheets

With its versatile A3 document feeder and uniquely compact design, the imageFORMULA DR-M1060 is perfect for reliably scanning various document types, while keeping the footprint low – making it ideal for offices that need A3 scanning but are limited by space.

## Unique space-saving design

The DR-M1060 is a uniquely compact A3 scanner – ideal in corporate office departments or decentralised branch offices that have limited desktop space but require A3 scanning. Users will appreciate the comfortable and convenient operation of the front document feed and exit design, especially when handling A3 size documents.

## High-performance scanning, built to last

Despite its compact design, the DR-M1060 is robustly built for handling high-volume workloads of up to 7,500 documents a day. It is extremely productive with ultra-fast duplex scanning speeds of up to 120ipm (A4) and a 60-sheet document feeder – ideal for fast-paced business environments.

## Exceptional image processing quality

Enjoy perfect image results with the DR-M1060's host of advanced image processing features, such as Advanced Text Enhancement that produces clear legible images even from faint text originals. Additional features like Auto Colour Detection, Auto Size and Deskew Correction, Text Orientation Correction and Customised Colour Dropout further enhance image quality and consistency.

## Ultra-smart, ultra-efficient handling

With skew detection, and ultrasonic double feed detection, the DR-M1060 reduces errors and saves time when scanning. A convenient Double Feed Release (DFR) feature allows you to quickly 'ignore and continue' scanning in special cases where a double feed has been incorrectly detected, such as when scanning an envelope or a document with a sticky note. Users can save time by conveniently separating batches of documents automatically using a blank page separator sheet.

## Reliable and versatile paper handling

The DR-M1060 offers maximum document handling flexibility, allowing users to choose between two feeding mechanisms, U-turn Paper Path as default and Straight Path when Straight Path Tray is open. With a robust feeder mechanism it's easy to scan a variety of media types, including embossed/plastic cards, thick and thin media – and up to 3m long documents. Users also have the ability to scan A1 size documents using the folio mode feature whenever they need it.

Long Paper Scanning

## Packed with the latest software

### Capture Perfect

Tailor-made for business-critical batch scanning, CapturePerfect includes a great range of viewing options alongside flexible 'scanning to' options like scan to folder, email or SharePoint.

### Capture OnTouch

Intuitive capture software that makes it quick and simple to achieve premium quality results. Scan to multiple file formats including PDF, PDF-A, TIFF, JPEG, BMP, and PPTX; send images directly to data management applications, such as SharePoint for smooth, efficient document workflows. For routine scanning tasks register up to 9 scanning jobs for fast, accurate processing.

Save money while significantly increasing productivity with automatic image processing and document handling that helps to achieve excellent image quality every time. With its industry-leading imaging quality, KOFAX VRS improves readability and raises OCR recognition rates, so fewer re-scans are required.

eCopy PDF Pro Office is a powerful, easy-to-use desktop application that allows users to create, edit and convert PDF documents easier than ever before.

### Extra advantages make a difference

The DR-M1060 comes with a host of optional accessories that enable users to be even more productive. The A4 and A3 optional Flatbed Scanner units allow users to scan bound books, journals and fragile media. These USB-connected dual-scanning flatbed units work seamlessly with the DR-M1060, so users can apply the same image-enhancement features to any scan. A 2D Barcode Module is also available that enables barcode recognition of QR codes, PDF417 and Data Matrix formats.
